

**AMENDMENTS TO THE SPECIFICATION**

Please amend paragraph [0042] as follows:

[0042] In another embodiment, at least one portion of the first, second or third portions 104, 106, 108 of the connection member is made of resorbable material. As the leads 10a, 10b are deployed in the body, if one of the portions is absorbable, then when that portion is absorbed, the leads 10a, 10b are separated and are ~~the~~ then capable of removal by non-surgical means (the lead is pulled from the body).

Please amend paragraph [0043] as follows:

[0043] Different materials having different resorbable characteristics, such as strength, stiffness, amount of time to resorb, etc., may be used as desired. The specific composition and type of resorbable material utilized will be determined (as necessary or desired) by those skilled in the art, and is likely to be chosen to meet the desired} application. The present invention lead 100 is shown in FIGURES 2A and 2B with two leads (or lead bodies) 10a, 10b. It will be understood that additional leads (or lead bodies), such as three, four, etc. may be utilized herein consistent with the present invention.
